

MadaCheck

Beyond the Lab Within 20 Minutes

Quantitative oral diagnostics for humans and animals

STEP 01 Swab the mouth

Rub gently around the cheek and palate about 10 times.

STEP 02 Insert the cartridge

Load it into the analyser and start the test from the app.

STEP 03 Result in 20 minutes

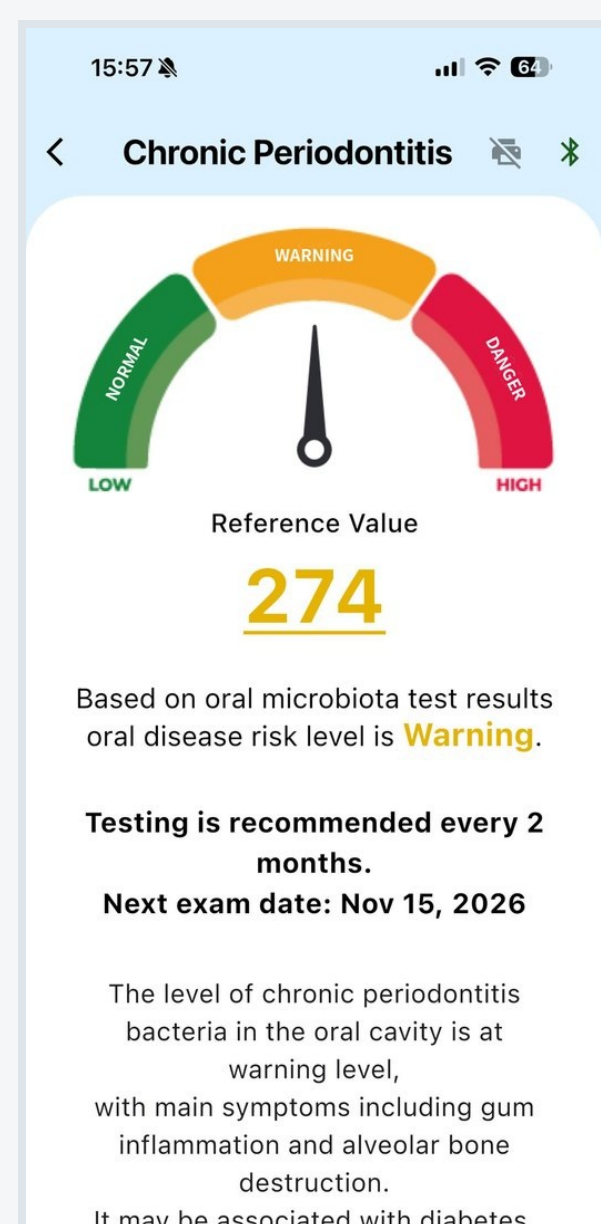

Reference value and risk level, on the device and in the app.

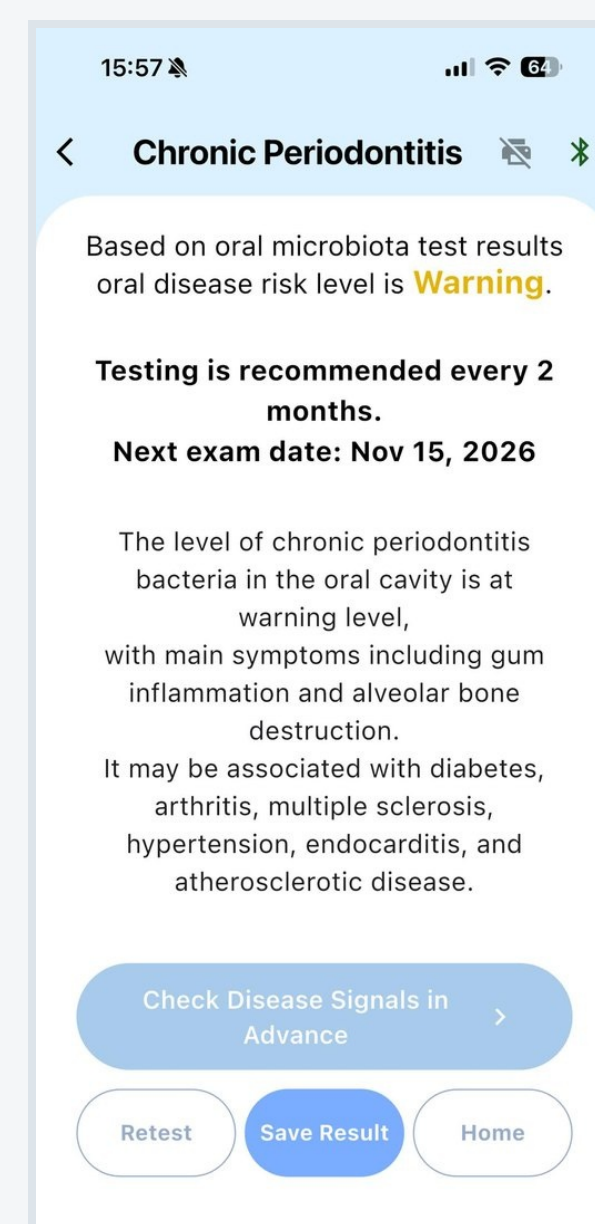

Guided by the MadaCheck app

Connects to the analyser over Bluetooth, guides each step, explains the result and reminds you when to test again.

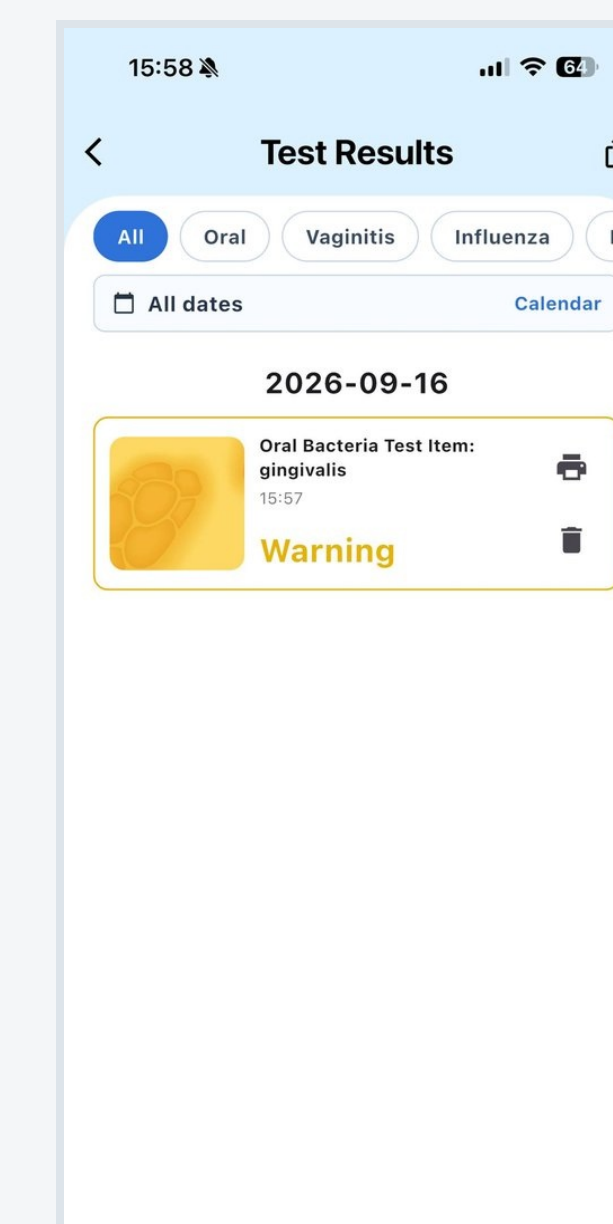

Free on iPhone (App Store) and Android (Google Play)

Risk level at a glance

Benefits for humans

- **Early warning**
Flags gum disease risk before pain, bleeding or loose teeth.
- **Timely dental care**
A clear reason to see the dentist while treatment is still simple.
- **Track progress**
Compare values after treatment and between check-ups.
- **Whole-body health**
Gum disease is associated with diabetes and heart disease.

Benefits for animals

- **No anaesthesia to screen**
A quick oral swab during a routine visit.
- **Catch hidden problems**
Pets hide mouth pain, so disease is often found late.
- **Better referrals**
Helps vets decide which animals need a full dental work-up.
- **Quality of life**
Comfortable eating; oral disease is associated with heart, kidney and liver changes.
